

## SourceTech Tellus® Mobile™

### Mobile Web

SourceTech has developed a mobile web page to make it easier for the users to use the most common Tellus functions. SourceTech Mobile has support for the most common operating systems, iOS, Android and Windows Phone 7.5. But the best with Tellus Mobile is that it's free, available from Tellus 2.7.4.4.

### Manage Absence

With Tellus you are able to manage your absence, even when you are on the run. In the absence view you can look at your active absence and your upcoming absences. If you would like to edit or remove a absence this is easy to do just by clicking at the absence. At the create view you are able to add a absence. When you create a absence you can choose to set the absence with the default settings, that are made in your system. Of course it is possible to make advanced settings to decide how you phone should be handled during this absence.

### Search

With the search function in Tellus Mobile you are able to search for your co-workers directly in the mobile. The search criteria of the search is made with name/number. When you have made a search it is easy to view if the person is absent or present. If the person is absent you will, by clicking at the person, view details of the absent like absent definition and start and end time for the absence. Other details that are displayed here is company and department affiliation. Contact information of the person is also displayed here and it is possible to call the person by clicking at the persons number or email by clicking at the email.
